**Note:** The last 4 columns of each country file are just informational.

Therefore, leave out the last 4 columns of each file - focus on the first 6 columns only.

Also, the data tracks country codes only. Please integrate country names into the data.

There are online sources that provide a listing of both country ISO-codes and names

(e.g., <https://www.iban.com/country-codes> and <https://countrycode.org/>)
